RICARDO RAMOS

INDUSTRIAL ENGINEER - FRONTEND DEVELOPER JR

ABOUTE ME

The desire to learn, my dedication and responsibility define me. I am looking for a developer position that will allow me to continue developing my skills and also learn new technologies. I work with ReactJS, Javascript, Boostrap, Antdesign, css, sass, html. I have Backend knowledge in node.js, express, mongoDB, mongoose, nodemon and jwt.

As an industrial engineer I have extensive experience in several areas as engineering, production, management, quality control, cost control. This led me to seek high standards in my professional performance.

EXPERIENCE

Frontend React
SwapiApp-Freelance
I used SWAPI api to develop a web page whith CRUD section for starwars caracters, also have diferents search parameters

Fullstack ReactJS & NodeJs
Moviepop-Freelance
Mini Proyect on ReactJS that shows movies/series info. You can search for movies and save it as favorite once you login

Frontend React
BigBurger -RollingCodeSchool.
Frontend ecommerce app to order food. It have both client and admin side, and it render acording to the user role. On admin side you hace a CURD of products, users and clients orders. Yhe client can sign up and order.
Tech used: ReactJS, Javascript, HTML, CSS, SASS, Node.js, MongoDB, JWT, Ant-Design

Scrum Master y Desarrollo Frontend
Cinefilos-RollingCodeSchool
Application to show movies from a json file with a CRUD section.
Tech used: Javascript Vanilla, HTML, CSS, Boostrap
